OFF-SITE SOLUTIONS

PROJECT ASPIRE

SALISBURY PLAIN

This contract, carried out in conjunction with Corus Living Solutions, involved the delivery of new living accommodation for 18,700 British Army soldiers (20% of the British army) on Salisbury Plain.

Our 'BourneStair' product provided a fully contained stair solution for this project and enabled a simple interface with the building structures.

Our 'BourneStair' modules offer a fast track on-site installation, providing a stair access that is available for immediate use. Establishing a working staircase at a relatively early stage of the construction process provides enormous benefits in terms of access and Health & Safety, by dramatically reducing the reliance on scaffolding and other forms of temporary access.

This project further demonstrates our determination to achieve excellence in construction by utilising the best in off-site technology.

Market Sector:	Modular
Client:	Aspire Defence
Engineer:	Scott Brown Rigg Turner
Main Contractor:	Corus Living Solutions
