

## Saxilby AFA

Peterborough

Market Sector: Rail  
Client: Network Rail  
Main Contractor: Carillion  
Tonnage: c125

**This project consists of disabled ramps, a bridge and staircases that Bourne Special Projects provided as a modular solution to reduce the installation period.**

As part of the service all components were finished with Protective Treatment N1 paint. BSPL also provided anti-slip flooring, stair nosing's, drainage and containment for M&E which were all completed before the first lift.

Early collaboration with our client and Network rail ensured this project was on time and on budget.
