

ASDA MULTI STOREY CAR PARK WEYMOUTH, DORSET

Bourne Parking was contracted to supply the full turnkey design and build of a new multi-storey car parking facility for ASDA at their superstore in Weymouth.

The 311 space multi-storey car park comprised of two suspended parking levels and a new customer interface area providing access directly into the superstore from the car park; incorporating a high specification cladding system, galvanised steel frame, Bourne Parking's Montex flooring technology and an integrated crash barrier system.

The scheme had a very challenging programme which involved Bourne Parking constructing the multi-storey car park around a live supermarket environment and associated car park, as well as the main contractor constructing the new store extension.

Constructed in a series of phases, the multi-storey car park was completed ahead of the busy summer tourist season and in time for the London 2012 Olympics, with the sailing being held in Weymouth and Portland.

Market Sector: Retail, Parking
Client: Asda
Main Contractor: ISG Pearce
Spaces: 311
